Claims 1 and 2-10 dependent thereon are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear whether an article or a method of manufacturing an article is claimed. Method steps such as "formed by" and "installed inside" (as recited in claim 1) and "formed by bending" (as recited in claim 2) are improper in an article claim.

Since it is not clear what applicant is claiming, neither a proper classification nor a proper search can be conducted as to the merits of the claimed invention.

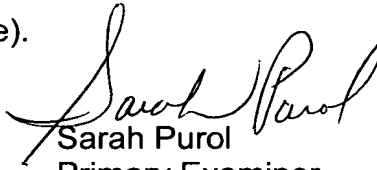

Applicant is required to submit either method or article claims –not both in the same application and certainly not in the same claim. Article and method of manufacture are considered as two patentably distinct inventions worthy of different classifications and different searches.
